

How to Use the New Ventis Slide-on Pump

by Industrial Scientific | Apr 28, 2017 | Gas Detection Education, Gas Detection Equipment

If you're someone who needs a gas monitor for both personal protection and confined space monitoring, you might be carrying around multiple gas detectors to do the job. Why carry around unnecessary monitors when one flexible instrument will do the trick? The new [Ventis Slide-on Pump](#) is compatible with both [Ventis™ MX4](#) and [Ventis™ Pro Series Multi-Gas Monitors](#) and is ideal for workers who typically wear their gas monitors for personal protection but occasionally require a [pump for remote sampling](#) applications.

Additional benefits of the Ventis Slide-on Pump include:

- The ability to draw air samples from up to 50 feet away
- No tools are required to attach or remove the pump from the monitor
- Monitors and pumps use the same type of battery packs and chargers making them easy to exchange

Watch the video series below to learn everything you need to get up and running with the Ventis Slide-on Pump.

Browse our [slide-on pumps](#) and [gas sampling accessories](#). Need more training videos like this one? We've got you covered on our [gas detection training video](#) page.
