**Industrial Scientific Launches the Gas Detection Made Easy™ Mobile App**

*The Gas Detection Made Easy app is a free training and reference tool for gas detection information on the go.*

**PITTSBURGH, PA – 21 April 2016** – [Industrial Scientific](http://www.indsci.com), the global leader in gas detection is pleased to introduce the Gas Detection Made Easy application. The application was designed by Industrial Scientific’s training team based on the curriculum taught during basic and advanced courses.

The app is geared toward anyone who wants to learn about gas detection techniques and technologies. It is an ideal study tool to reinforce in-person training or a quick reference for those wanting to refresh their gas detection knowledge. It covers sensor technologies, gas hazards, gas monitoring applications, and current regulations governing gas detection. Key features include the ability to take notes, send notes via email, add bookmarks to view at a later time, and perform keyword searches.

“We are always looking for ways to help people be safer in the field,” said Jeremy DaValle, training team lead. “And for those who can’t get regular training refreshers, the app is a great supplement.”

“Having gas detection equipment is only part of the equation. You need to also have an understanding of the hazards you’re up against, and this app will be a useful reference guide for users whether they’re beginners or veterans,” said Justin McElhattan, president and CEO.

The Gas Detection Made Easy app is free to download from the [Google Play Store](https://play.google.com/store/apps/details?id=com.indsci.gdm), [Apple App Store](https://itunes.apple.com/us/app/gas-detection-made-easy/id1088888888), and can be accessed via [www.indsci.com](http://www.indsci.com).

**About Industrial Scientific Corporation**

As the global leader in gas detection, Industrial Scientific provides gas detection products and services that keep workers safe in hazardous environments. The company’s more than 700 employees in 25 countries are committed to preserving human life, and have dedicated their careers to ending death on the job in this century. Established in 1985 and headquartered in Pittsburgh (USA), Industrial Scientific also has operations based in Arras (France), Dortmund (Germany), and Shanghai (China), and provides technical services to customers from local service centers around the world. Industrial Scientific is the parent company to Predictive Solutions Corporation ([www.predictivesolutions.com](http://www.predictivesolutions.com)).
